honestly, i am super impressed. this is a fantastic, story rich example of what a HOG should be. I even love that you can turn off the HOG option in the menu in case it starts to get tedious. the story is very well told and very well paced. There's a lot of great atmosphere and intrigue and it leaves you wanting to know more. count me in for part 2, if it ever gets released, haha!. To get an idea of what really started it all, this is the game to play. For todays standards this game can still compete with some of the crap thats currently out there. I wouldnt say there is any long term potential left for this game though, short vacations is about all its worth, short vacations with friends makes it even better.. Every pc gamer who loves controller should have this.. I have a number more of logged hours than what steam can give me credit for but here is the thing. Mortal Online, while old and dated when it comes to the graphics has a lot of features that unfortunately not adopted by the MMO genre. There is a need to establish relationships and a lot of opportunities to help your fellow gamer. I get a lot of joy out of showing newer people the ropes of the game in hopes that they too enjoy the game as much as I do. The combat is fun and challenging especially when fighting other players, the crafting and gathering is insanely deep and involved. The game is 7 years old and still running even with its small community and I think that says something people should consider.

If you miss the old days where you could create relationships with new people rather than hitting the queue button over and over this might be the game for you, if you want to look me up feel free to do so I am always looking to help others and show people the ropes. I'd recommend this if you are looking for a change of pace from the homogenized norm that is MMO's today.. idc what anyone says, gta 4 has an amazing story. Quality DLC with a more consumer friendly pre-order policy

- + the leaders have their own unique playstyle
- + the Yellow Turbans have 3 hybrid classes as opposed to the standard 5 classes of the Han factions
- + different unit roster (dual sword wielding warrior monks, two handed mace infantry, axe cavalry and other)
- + the Yellow Turbans have their own reform tree
- + different empire progression
- + all 3 starting positions are brutal ( surrounded by enemies, limited diplomatic options at the start) and enable a challenging campaign
- + the "early adopter bonus" is more fair than other DLC policies ( get the DLC for free by pre-order or purchase during the first week after the game releases)

-it's still day 1 DLC

Overall 9/10. Bought it knowing well its in alpha... but wow... nothing to kill, nothing to do other than shot magic at the terrain with all the pre-included tools/weapons oh, and your limited on terrain about 10 acres, it shockingly runs fine on mine. but with a GTX 680

i would hope so! Was not worth the price. at least at it's current state. i would give it some time, get in some infiniately procedurally genrated terrain and some monsters to pose a threat and maybe than it will hold some ground. until then. avoid it. i would consider this still "indev"

Please don't judge me. It's my little girl whose playing the game not me. I would definitely give this a flaming thumbs down if it weren't for my kid playing this game as I clean our bathroom. The 9 hours is part of my total bathroom cleaning time. 10/10 would have their kids play this as they clean.. easy to learn, nice graphics, not just building structure. i like it. i like this game ... nice game play. This is a good game with great potential. The game mechanics are well made and planned, and its concept is indeed fun. There is so much room for improvement, however, the foundation of the game is strong, and is stable on its own. I do suggest that the developers improve the game, and improve on a lot of areas. Blood Waves, i feel, is only 10% to 20% complete, but is a very, very strong 10% to 20%. As an early access, it is a good game. I'm reviewing this game as of version 0.6. The remaining 0.4 should have a steep and uphill development, because the game is obviously not ready for a version 1.0. Still, a really really fun game.. It's so funny. I love this game
